

CR 30 SP+ PACKAGE

An Agfa Solution for Quantum Medical Imaging

NX

CR 30-X is available in combination with NX, Agfa HealthCare's image identification and quality control tool, for a highly efficient and optimized radiology workflow.

Cassettes With Memory

CR 30-X uses dedicated cassettes with an embedded memory that stores the data entered during identification. The built-in antenna card identifies the data by no-touch radiofrequency tagging. ID data and images are linked from the beginning throughout the entire electronic processing system.

Add an Option, Brighten Your Digital Future

- NX Optview:
 - Square Marker, Grid Line Suppression and Black Border licenses
- NX Integrated Workflow:
 - Emergency, MPPS and Viewing Prior licenses
