

## eCare.com Payer Access

Nebo Systems eCare.com website improves staff productivity by offering access to all payers with a single password. Working in a real-time environment and at the point of registration, staff can quickly verify coverage, co-pay amounts, deductibles and more. Increase up-front collections while reducing denials and rejections.

Additional features make this a useful tool on both the front and back end operations. Batch processing of Self-Pay accounts automatically determines Medicaid coverage, and address verification functions help to work returned mail. A handy UPIN lookup, BC Pre-cert and LCD tools add to the value of our browser-based system.

- Eligibility
- Claims status
- Robust list of Commercial and Government Payers
- **No startup cost**
- **No transaction fees for most Commercial Payers**
- Self pay batching
